#15 Dahlia Pink

#16 Cinnamon Mocha

All of our CURRENT products are waterproof.

However, please note that waterproof doesn't mean oil-proof...the products will fall off if/when you eat oily food. This is normal. Or if you mix matte lipstick with lip gloss...lip gloss is oily therefore the lipstick will become oily too and fall off.

That's why the no.1 tip to remove matte lipstick is to apply tissue oil to your lips or Vaseline, it'll wipe off easily.

ELEVATE YOUR ESSENCE.

## *Educational Guide*

A Vegan-Friendly and Cruelty-Free Lip Gloss and Matte Liquid Lipstick has two distinct, but often related, ethical standards:

- **Vegan-Friendly**

A product that is vegan-friendly means that it does not contain any ingredients derived from animals or insects.

For lip products, common non-vegan ingredients that are avoided include:

- **Beeswax (Cera Alba):** Used for texture and thickness.

Vegan alternatives include plant-based waxes like candelilla wax or carnauba wax.

- **Carmine (Cochineal Extract):** A bright red pigment derived from crushed cochineal insects.

Vegan pigments are created using mineral or plant-based colorants (like beetroot powder or iron oxides).

- **Lanolin:** An oil/grease derived from sheep's wool, used for moisturizing.

Vegan alternatives include plant oils like shea butter, coconut oil, or jojoba oil.

- **Honey:** Used for moisturizing and flavor.

- **Guanine/Pearl Essence:** Derived from fish scales, sometimes used for shimmer or a glossy effect.

Vegan shimmer is achieved using minerals like mica.

### Cruelty-Free

A product that is cruelty-free means that the product and its ingredients were not tested on animals at any stage of development or production.

This includes:

- The final product not being tested on animals.
- The raw ingredients not being tested on animals.
- The brand not commissioning any third party to test its products or ingredients on animals.
- The brand not selling in countries where animal testing is legally required.

### Key Takeaway

While the terms are related, they are not interchangeable:

- A product can be Cruelty-Free (not tested on animals) but not Vegan (it might contain beeswax or carmine).
- A product can be Vegan (no animal ingredients) but not Cruelty-Free (the final product or its ingredients might have been tested on animals by the company or a third party).

When a lip gloss or matte liquid lipstick is labeled as "Vegan-Friendly and Cruelty-Free," it means it meets both standards: it contains no animal-derived ingredients and was not tested on animals.

ELEVATE YOUR ESSENCE.
